

AMENDMENTS

In the Claims:

Amend claims 1, 4 and 10 as follows:

1. (Four Times Amended) A two-layer laminate film, comprising:

- a) a first resin layer comprising a polyolefin resin and having a surface treated by a discharge treatment method that imparts printability to the treated surface; and
- b) a second resin layer comprising a resin, a first additive material and a second additive material, wherein the resin of the second resin layer consists essentially of polypropylene resin and the second resin layer is formed on and adhered to a surface of said first resin layer opposite the treated surface having said surface treatment,

wherein the first resin layer and the mixed resin layer each contain up to 800 ppm fatty amides comprising stearamide or erucamide,

the first additive material comprises at least one crosslinked silicone polymer in an amount of about 0.1% - 0.5% by weight of the mixed resin layer and/or at least one silicone oil in an amount of about 0.02% - 0.2% by weight of the mixed resin layer, and

the second additive material comprises at least one amorphous aluminosilicate in an amount of about 0.10 - 0.50% by weight of the mixed resin layer.

4. (Twice Amended) The two-layer laminate film according to claim 1 or 2, wherein said second resin layer has a thickness of about 0.2 - 5.0 μm .

10. (Thrice Amended) The two-layer laminate film according to claim 1 or 2, wherein the resin of the second resin layer consists of a polypropylene homopolymer.
